# Luxalon® Exterior Ceilings

a proven system

## Withstand outdoor conditions

Exterior building applications need to contend with a wide range of severe outdoor conditions. Luxalon® Exterior Ceilings of Hunter Douglas have proven extremely durable for more than fifty years; developed with surface-treated panels and a windproof suspension system, they stand up to the harshest conditions.

## Installed in a variety of projects

Architects and designers worldwide know the strength of Luxalon® Exterior Ceilings and have installed these ceilings in prestigious projects including airports, railway stations, office buildings, shopping malls and hotels.

## Design flexibility

The Luxalon® Exterior Ceiling system creates new opportunities for expressive architecture and adds beauty and durability to any building's exterior. Allowing a wide range of design possibilities exterior ceilings are specially developed with the same aesthetic appearance as Luxalon® interior ceilings.

Product : 200T Exterior Ceiling  
Architect : RET Development

## Severe Conditions, Extreme Resistance

**Luxalon® Exterior Ceilings are the ideal in exterior solutions. Coated with Luxacote®, developed with a durable base of materials, and containing the Luxalon® ProFix™ exterior suspension system, these exterior ceilings can withstand the most oppressive outdoor conditions. All over the world, Luxalon® Exterior Ceilings stay strong and look impressive in the face of intensive sunshine, dramatic temperature changes, moisture, extreme climates, and strong wind loads.**

## Protected by Luxacote®

Luxacote® is a special treatment for Luxalon® Exterior Ceilings. Proprietary Hunter Douglas' Luxacote® makes exterior ceilings extremely durable, providing colour and gloss stability, high scratch resistance, and resistance to corrosion. With Luxacote®, there is no need to recoat, which reduces maintenance costs and additional environmental impact.

Luxacote® protects the aluminium surface from corrosion and permanently anchors the paint to the metal surface. It contains highly colour-stable pigments for optimal colour-fastness and a highly scratch- and wear-resistant surface. Luxacote® also filters UV-light to provide extra colour and gloss durability.

Unprecedented Protection  
**LUXACOTE®**  
for exterior application

# Secured by Luxalon® ProFix™

Luxalon® ProFix™ is a suspension system made by Hunter Douglas expressly for Luxalon® Exterior Ceiling applications. A cost- and time-saving tool, the system simplifies installation and provides safety and reliability, even when faced with strong wind loads. With the same wind loads, fewer Luxalon® ProFix™ hangers are required to create the same level of durability as a standard suspension system.

## Made with the strongest base material

It takes more than a good pre-treatment and stable colour coating to produce a product that holds up to the outdoors. For optimal durability, Luxalon® Exterior Ceilings are made with a highly corrosion-resistant aluminium alloy: EN AW 3005. Hunter Douglas has completely integrated the application of Luxacote® into the production process. The result: extremely durable products with slightly textured surfaces that manage potentially damaging outdoor conditions.

**As an expert in exterior ceilings, Hunter Douglas offers excellent technical support to business partners. Our calculation tools help to make the designs of exterior ceilings durable and windproof, even in the case of strong wind loads.**

## Model for wind loads

To improve service, Hunter Douglas asked a leading independent testing and research institute (TNO, the Netherlands) to develop a dedicated model for wind load calculations. With this model it is possible to calculate wind loads in relation to location, height and climate zone all over the world.

The results of wind load calculations make it easy to use our span tables, which are available for all types of Hunter Douglas ceiling panels and carriers. These tables support the engineer in developing the optimal and most economical hanging construction for the designed exterior ceiling.

## A tested system

TNO, the Netherlands has extensively tested Luxalon® Exterior Ceilings against varying wind loads.

# Endless design possibilities

Luxalon® Exterior Ceilings consist of five standard colours, twelve optional colours and many different panel systems. Three of the systems contain different panel sizes, making it possible to mix and match the different sizes to customize the perfect look for your design.

In addition to Luxalon® Exterior Ceilings, Hunter Douglas offers Solid Linear Wood ceilings, Wood Panels and Stretch Metal ceilings for exterior use. For more details, please request our specific product brochures.

## Bring the outside inside

Some Luxalon® Exterior Ceilings are also available for interior applications. You'll find the details in the table below. Use these matching items to design a homogeneous ceiling that visually connects the interior and exterior of a building.

## Add a curve

Concave, convex, and undulating sections can be easily formed to design the perfect curved ceiling.

# Designed to work for you

**Hunter Douglas is a global player within the field of modern architecture. We understand the conflict between form and function better than anyone, and enrich the market with inspiring solutions that strengthen the aesthetic appeal of buildings and their functionality in terms of indoor climate, energy use and acoustics.**

We develop clever and aesthetically appealing solutions in collaboration with architects and designers to control heat, light, sound and energy. We are also inspired by real-world challenges and ideas as well as developments in technology and materials. All our products are thought out in great detail to make a difference to both architects and end users.

Hunter Douglas adopts the cradle to cradle (C2C) product philosophy to the design of products that fit the circular paradigm. Our products are designed for longevity, using materially healthy technical nutrients that can be reused at end of life as a high-quality source for something new.

*Cradle to Cradle Certified™* is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

## Architectural services

We support our business partners with a wide range of technical consulting and support services for architects and installers. We assist architects and developers with recommendations for materials, shapes, dimensions, colours and finishes. We also help create design proposals, visualisations and technical drawings. Our services to installers range from providing detailed installation drawings and instructions.

## More information

Contact our **Project Support** for further help and advice on the design possibilities our applications can create.
